

Advanced Serial Management (ASM)

Adhere to data validation, security and process integrity requirements mandated by the FDA, including 21 CFR Part 11

Increase quality while maintaining a highly controlled environment in Microsoft Dynamics GP

For organizations who compete on quality, Merit Solutions' **Advanced Serial Management (ASM)** expands your ability to operate efficiently while controlling restricted materials within Microsoft Dynamics GP.

Increase Control

- Specify QA controlled items within Dynamics GP that are subject to additional controls activated throughout the software.
- Establish QA Authorized users to restrict changes to important attributes, such as status and expiration date, for controlled materials.
- Control serialized items with the addition of four status assignments: Hold, Approved, Quarantined and Rejected.

Track Lot Information Completely

- Specify QA controlled items within Dynamics GP that are subject to additional controls activated throughout the software.
- Establish QA Authorized users to restrict changes to important attributes, such as status and expiration date, for controlled materials.

Maintain Compliance Automatically

- Use the Serial Attribute Maintenance Screen for managing updates to one or many serialized items.
- Used with Microsoft Audit Trails, Advanced Serial Management operates in accordance with the requirements of FDA 21 CFR Part 11.

Item Number	Serial Number	Status	ExpirationDate
DYNGYRO100	DYNG201704120001	Approved	7/7/2020
DYNGYRO100	DYNG201704120002	Rejected	7/7/2020
		Approved	
		Hold	
		Quarantined	
		Rejected
