

Advanced Serial Management

Increasing Control of Your Operation
with *Merit Solutions*

Overview

Advanced Serial Management increases your ability to operate efficiently while controlling restricted materials within Microsoft Dynamics™ GP.

Features You Need

Increase Control

- Specify QA controlled items within Dynamics GP that are subject to additional controls activated throughout the software.
- Establish QA Authorized Users to restrict changes to important attributes, such as status and expiration date, for controlled materials.
- Control serialized items with the addition of four status assignments: Hold, Approved, Quarantined and Rejected.
- Manage controlled materials by only allowing use of approved materials in manufacturing and distribution.
- Enforce rules for specific data choices and tolerances for serialized item characteristics.

Track Serialized Material Information - Completely

- Track controlled materials through all key stages of inventory processing such as Manufacturing Order Receipt and Inventory Adjustments.
- Works with Dynamics GP Inventory - Sales Order, Purchasing Order and Manufacturing Order Processing.

Maintain Compliance - Automatically

- Use the Serial Attribute Maintenance screen for managing updates to one or many serialized items.
- Used with Microsoft Dynamics GP Audit Trails, Merit Advanced Serial Management operates in accordance with the requirements of FDA 21 CFR Part 11.
