

Batch Management

Advancing Your Operations Toward
Audit *Compliance* with
Merit Solutions

Overview

For Microsoft Great Plains Manufacturing customers who are batch process manufacturers, Merit Solutions Batch Management provides advanced functionality for scheduling and completing batches of production within Great Plains.

Features You Need

Increase Control

- Provides a central, easy to use batch scheduling and management screen, including one view of all linked manufacturing orders to a production batch.
- Enables automatic rescheduling of manufacturing orders associated with a batch.

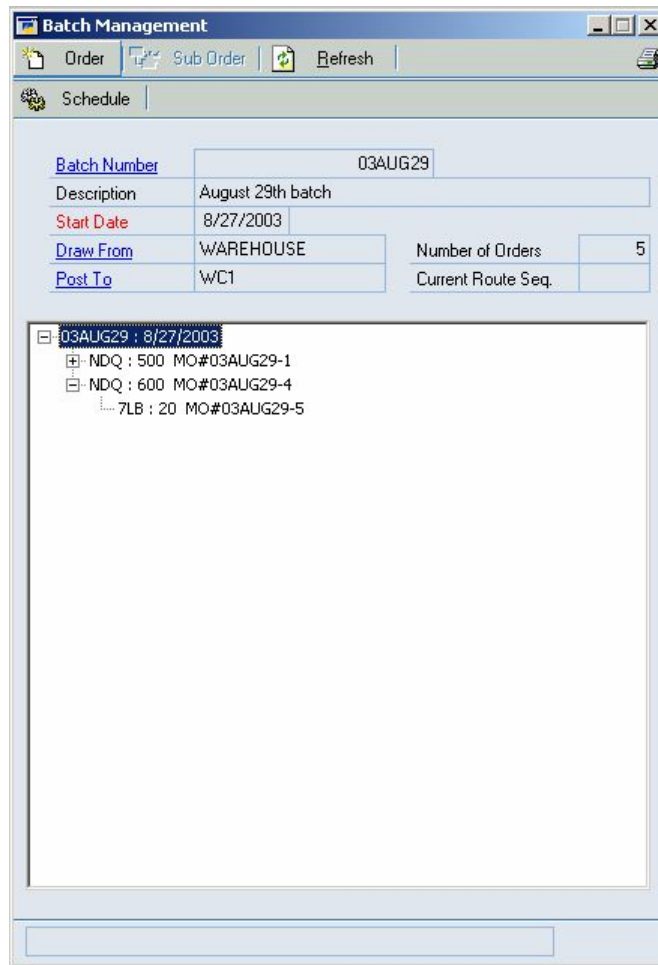

Manage Information

- Enables fast and efficient closing of multiple manufacturing orders related to a batch.

Maintain Compliance

- All changes to batch records are tracked, recorded and maintained.
- With Merit Solutions Audit Trails, Batch Management operates in accordance with the requirements of FDA 21 CFR Part 11.

Batch Management provides a central and easy to use batch scheduling and management screen, including a 'linked' view of all manufacturing orders associated with a batch.
